

- Ultra-High Pressure Injectors are used to install and demount interference-fit parts such as bearings, couplers, wheels, hubs, propellers and so on.
- Works on the principal of injecting oil under ultra-high pressure of 3000 kg /cm² between mated surfaces.
- Low effort on handle allows one -man operation.
- Easy to use.

WORKING PRESSURE 3000 Kg/cm²

OUTPUT PER STROKE 0.23 cm³

Model No.	OW-500
Working Pressure Kg/cm ²	3000
Nominal Oil Capacity (cm ³)	200
Output Per Stroke (cm ³ /per Stroke)	0.23
Max. Effort On Handle (kg)	36
Angle Of Handle Movement (°)	30
Dimensions (mm) BxLxH	52X130X315
Weight Without Oil (kg)	3.2

Note : The right to change any specification without notice is reserved because of constant R&D and product upgradation.
